

WEDNESDAY, OCT. 15

CADDO PARISH PIPELINE RELEASE UPDATE:

Sunoco Logistics, in cooperation with local, state and federal agencies, is continuing the containment and recovery of crude oil in Caddo Parish, La., following the release of an undetermined amount of oil Monday from the Mid-Valley Pipeline.

More than 125 Sunoco Logistics personnel and contractors are on site Wednesday continuing to recover oil and apply protective booms to a stream area southwest of Mooringsport. We will continue to work 24/7 on the containment and clean-up effort.

The release occurred near LA 169 south of Mooringsport. The oil has been contained and there is no apparent impact to Caddo Lake.

The cause of the release is under investigation in cooperation with the U.S. Department of Transportation Pipeline and Hazardous Materials Safety Administration.

Three households have been relocated while the cleanup continues.

Sunoco Logistics is working in cooperation with the following agencies, all of which have representatives on site:

- **Caddo Parish Sheriff's Office**
- **Louisiana State Police**
- **Louisiana Wildlife and Fisheries**
- **Louisiana Oil Spill Coordinator Office**
- **Louisiana Department of Environmental Quality**
- **U.S. Environmental Protection Agency**
- **U.S. Fish and Wildlife Service**
- **U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration (PHMSA)**

The Mid-Valley Pipeline carries crude oil from Longview, Texas to Samaria, Michigan, serving Midwestern refineries. The section of the pipeline between Longview and Mayersville, Mississippi, was shut down Monday, as part of the response. The entire line had been scheduled to shut down Tuesday, Oct. 14, for two days of scheduled maintenance. We have no updates on Mid Valley Pipeline service restoration at this time.
